ip data²

PILOT
Manage your IP portfolio

IP data² offers free access to your IP portfolio via a secured extranet site, whether you are at the office, in telecommuting or on the road.

Your issues
- View your current deadlines
- Consult and export all the documents related to each file
- Manage your entire IP portfolio
- Access all our modules

Pilot your IP in total autonomy

- With IP data², the administrator of your company manages, in total autonomy, the users list of your company. It is possible to create, delete or modify user accounts with distinct access and rights (visualization, sending instructions, etc.)

- IP data² allows you to create your own queries and extractions. Lavoix can also establish for you specific lists not initially foreseen and make them available to you in IP data² at a predefined frequency (some specific work may be subject to an invoice)

- You can consult and export all the documents related to each file: patent applications, analyses, official letters, prior art, trademarks, models, invoices...

- You access all our modules for free:
    - easypatent to send your instructions and obtain real time estimates
    - easystamp to time-stamp your documents online
    - easytransfer to send us your documents, etc.
    - easyfinance to consult and extract your accounting and financial information
    - easyrenew to maintain your patents and manage your annuities

- A training to discover the functionalities of the site is offered and provided by our team. Online help is also available on the website

How to get d'IP data²?
Get in touch with your usual contact to get an access to IP data² or to know the conditions of use.

IP data² will be available to you as soon as possible (subject to the technical compatibility of your operating system).
